Standard single row Timken Bearing as used in the majority of applications.

ENGINEERING FOR VICTORY WITH TIMKEN BEARINGS

Victory for the United Nations in the war will, to a great extent, be a victory for American engineering and incidentally, for Timken Tapered Roller Bearings.

Many lessons will be learned from experience gained in designing war equipment and the machines that make it—lessons that you will profit by in future years when your student days are over and you are called upon to take an active part in the tremendous work of world reconstruction.

Among other things you will find—as thousands of experienced engineers already have proved—a thorough knowledge of Timken Bearings and their application as useful as your slip stick. It will enable you to meet every bearing requirement completely and soundly. We will be glad to help you with your bearing problems at any time.

COMPANY, CANTON, OHIO

TIMKEN
TRADE-MARK REG. U. S. PAT. OFF.
TAPERED ROLLER BEARINGS

Manufacturers of Timken Tapered Roller Bearings for automobiles, motor trucks, railroad cars and locomotives and all kinds of industrial machinery; Timken Alloy Steels and Carbon and Alloy Seamless Tubing; and Timken Rock Bits.

"TO PROVIDE FOR THE COMMON DEFENSE, TO PROMOTE THE GENERAL WELFARE"

Bad medicine for big bombers

ONE WAY to spoil a bomber's aim is to hang a curtain of steel over your ship and dare him to come down through it. To get that curtain of steel up there requires quick-firing, flexible guns.

To the plant of the Westinghouse Electric Elevator Company the Navy, a few months ago, brought its plans for such a gun. And to Westinghouse was given the important job of building the mounts that would control the aiming of these batteries of quick-firing guns.

And the Navy said, "Well done!"

Today, over the Westinghouse plant, there floats the Navy's "E" pennant—for excellence—eloquent testimony to the manner in which this Westinghouse plant performed the job. How was this plant able to get into growing production of these mounts so quickly? The answer lies in a Westinghouse characteristic called "know how"—the ability to get things done in the best possible way.

This Westinghouse "know how" makes itself felt wherever Westinghouse craftsmen build things. Whether for the common defense or the general welfare, this "know how" is doing a job. The same skill and ingenuity that made so many splendid things for peacetime living are now being applied to many important war weapons.

"Know how" will work for you again

We look forward to the day when we can give your home, your farm, or your factory the full benefit of Westinghouse "know how" again. To speed that day means just one thing to us: to produce, in ever increasing quantities, the tools with which to get the victory job done.

Proudly We Hail Our 600

• No group at Westinghouse has met its responsibilities in our war effort with more zeal and ingenuity than the 600 young engineers who only last year were your college mates. Already, their work in research and design has made vital contri-

butions to our country's drive for victory.

This year, hundreds who are now college seniors will find at Westinghouse, as perhaps nowhere else, an opportunity to apply their schooling and intelligence toward winning the war.

Published in the months of November, December, February, March, April, May and June by the students in the College of Engineering, The Ohio State University, Columbus, Ohio. Subscription price, 97 cents (tax 3 cents) per year for seven copies: Single copies, 15 cents each. Make checks and money orders payable to THE OHIO STATE ENGINEER.

Entered as second-class matter May 15, 1912, at the post office at Columbus, Ohio, under the Act of March 3, 1879. Acceptance for mailing at special rate of postage provided for in Section 1103, Act of October 3, 1917. Authorized December 8, 1922.

After All..

CAREFUL
PLANNING

then that

EXTRA EFFORT

AS PUT FORTH BY CARROLL

is Your Greatest Assurance of Producing

Successful Printing

HERE, AT CARROLL PRESS, we never lose sight of the fact that only results will justify the expenditure of money on printing these days . . . that every piece of printing is a carefully planned selling message to be read by prospective purchasers of the product or service it presents. And so, on each job, we put forth EXTRA EFFORT to give that printing a better chance to succeed. That, probably, is the reason why so many large buyers of printing turn to Carroll Press year after year. They know how much this creative cooperation will contribute to the success of their printing. When you want successful printing, let us show you what we can do.

MOUNTING POWER FOR ALLIED WAR BIRDS

THIS engine mount destined for overseas service on an American made fighter plane is being fabricated by the best known method of joining metal — that is, by welding. For welding makes equipment a homogeneous, permanent unit, light yet exceptionally strong. This versatile process utilizes the Airco oxy-acetylene flame to make design problems vanish. It is applied rapidly and economically even under difficult shop and field conditions. The apparatus employed is simple, portable, easy to operate. » » So versatile is the oxy-

acetylene flame, so varied are its useful applications in the metal working field, that it has long since been drafted into service to speed defense by swiftly cutting metal to close tolerances, by hardening metal surfaces for longer wear, by cleaning them for faster, longer-lasting paint jobs, and by gouging metal with amazing speed and accuracy.

The interesting booklet "Airco in the News" shows pictorially many ways in which Airco products and processes are being used to help industry speed up production. Write for a copy.
